

I claim:

1. A multi-functional fishing accessory comprising:
a work surface, said work surface comprising a flat plate member;
one or more support tubes;
one or more support panels attached to said plate member for maintaining said plate member in a horizontal position; and
a plurality of straps for detachably attaching said work surface, said one or more support tubes, and said one or more support panels to a vertical member.
2. The multi-functional fishing accessory according to claim 1, wherein said work surface further comprises two side wall members fixedly attached to said plate member and a back wall member fixedly attached to said plate member and said side wall members.
3. The multi-functional fishing accessory according to claim 2, wherein an edge of each of said two side wall members is angled.
4. The multi-functional fishing accessory according to claim 2, wherein said work surface further comprises a plurality of drainage openings.

5. The multi-functional fishing accessory according to claim 4, wherein said plurality of drainage openings is formed by a plurality of cut-out sections in said back wall member along an edge fixedly attached to said plate member.

6. The multi-functional fishing accessory according to claim 2, wherein said plate member, said two side wall members, and said back wall member are fabricated of a rigid, plastic resin.

7. The multi-functional fishing accessory according to claim 6, wherein said rigid, plastic resin is a propylene polymer.

8. The multi-functional fishing accessory according to claim 1, wherein each of said one or more support tubes comprises a cylindrical section closed at one end by an end cap and two loops fixedly attached to the external surface of said cylindrical section in a laterally aligned orientation.

9. The multi-functional fishing accessory according to claim 8, wherein said end cap is formed with an opening for drainage purposes.

10. The multi-functional fishing accessory according to claim 8, wherein said cylindrical section and said end cap are fabricated of a plastic resin.

11. The multi-functional fishing accessory according to claim 8, wherein each of said two loops is fabricated of nylon.

12. The multi-functional fishing accessory according to claim 1, wherein each of said one or more support panels is hingedly attached to said plate member.

13. The multi-functional fishing accessory according to claim 1, wherein said one or more support panels are fabricated of a rigid plastic.

14. The multi-functional fishing accessory according to claim 13, wherein said rigid plastic is PVC.

15. The multi-functional fishing accessory according to claim 1, wherein each of said plurality of straps comprises;

a buckle defining a first end; and

a second end configured for insertion into said buckle;

whereby said strap is adjusted in length to detachably attach said multi-functional fishing accessory to said vertical member.

16. The multi-functional fishing accessory according to claim 1, wherein each of said plurality of straps is fabricated of nylon.

17. The multi-functional fishing accessory according to claim 1, wherein said plurality of straps is slidably attached to said work surface and each of said one or more support panels.

18. The multi-functional fishing accessory according to claim 1, wherein said plurality of straps is slidably attached to each of said one or more support tubes.

19. A multi-functional fishing accessory comprising:
a work surface, said work surface comprising a flat plate member;
one or more support tubes;
means for maintaining said plate member in a horizontal position; and
means for detachably attaching said work surface and said one or more support tubes to a vertical member.
